### **New Hampshire State Farm Service Agency**

James C. Cleveland Federal  
Building  
53 Pleasant Street, Room  
1601  
Concord, NH 03301  
Office: (603) 224-7941

### **State Committee:**

James Taylor, Chairman  
Bruce Clement  
Joshua Jennings

### **Acting State Executive Director:**

Linda L. Grames

Please contact your local FSA  
Office for questions specific to  
your operation or county.

### **Producers are Reminded to Complete NASS Crop Surveys**

The National Agricultural Statistics Service (NASS) Field Offices are currently completing 2015 small grain yield surveys and will contact growers in December to complete row crop yield surveys. If you are one of the producers contacted to complete a 2015 yield survey, we encourage your participation and cooperation as many USDA agencies including the Farm Service Agency (FSA) and Risk Management Agency (RMA) use the NASS yield data for their programs.

FSA uses NASS county yield data for farm credit, conservation, disaster programs, loan and commodity programs. Under the 2014 Farm Bill, FSA uses the NASS county yield data to calculate Agriculture Risk Coverage – County (ARC-CO) benchmark revenues and current year county revenues. For example, the 2014 NASS county yield, along with the crop's marketing year average price (MYA), are used to determine the county's current year revenue to determine if the county will trigger an ARC-CO payment. An ARC-CO payment is triggered for a county when the current year revenue falls below the guarantee revenue for the crop and crop year. In cases where NASS county yield data is not available, the FSA State Committee must determine a county yield using RMA yield data or the best available yield data, including assigning a county yield using neighboring county yields from NASS or RMA.

Any information that producers provide to NASS is kept confidential and protected by federal law. NASS publishes only aggregate-level data, ensuring that no individual operation or producer can be identified. All reports will be available at [www.nass.usda.gov](http://www.nass.usda.gov).

## **USDA Extends Dairy Margin Protection Program Deadline**

USDA's Farm Service Agency (FSA) announced that the deadline to enroll for the dairy Margin Protection Program for coverage in 2016 has been extended until Nov. 20, 2015. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating farmers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

Producers are encouraged to use the online Web resource at [www.fsa.usda.gov/mpptool](http://www.fsa.usda.gov/mpptool) to calculate the best levels of coverage for their dairy operation. The secure website can be accessed via computer, smartphone or tablet.

Producers who were enrolled in 2015 will need to make a coverage election for 2016 and pay the \$100 administration fee. Although any unpaid premium balances for 2015 must be paid in full by the enrollment deadline to remain eligible for higher coverage levels in 2016, premiums for 2016 are not due until Sept. 1, 2016. Also, producers can work with milk marketing companies to remit premiums on their behalf.

To enroll in the Margin Protection Program for Dairy, contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Payments under the program may be reduced by a certain percentage due to a sequester order required by Congress and issued pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985. Should a payment reduction be necessary, FSA will reduce the payment by the required amount.

---

## **USDA Adds More Eligible Commodities for Farm Storage Facility Loans**

*New Provisions Increase On-Farm Storage for Dairy, Flowers, Meats*

FSA's Farm Storage Facility Loan (FSFL) program, which provides low-interest financing to producers to build or upgrade storage facilities, will now include dairy, flowers and meats as eligible commodities.

For 15 years, the FSFL program has provided affordable financing, allowing American farmers and

ranchers to construct or expand storage on the farm and by adding eligible commodities; these low-interest loans will help even more family farmers and ranchers to expand on-site storage.

The new commodities eligible for facility loans include floriculture, hops, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Commodities already eligible for the loans include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, and fruits, nuts and vegetables for cold storage facilities.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport) or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

## Microloans

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from \$35,000 to \$50,000, on Nov. 7, 2014. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional \$15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA's continued commitment to [small and midsized farming operations](#).

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans. **Important Note:** *Microloans cannot be used to purchase real estate.*

Since 2010, more than 50 percent of USDA's farm loans now go to beginning farmers and FSA has increased its lending to targeted underserved producers by nearly 50 percent.

Please review the FSA [Microloan Program Fact Sheet](#) for program application, eligibility and related information.

---

## Carroll, Strafford and Rockingham Counties are Eligible for Emergency Loans

Carroll, Strafford, and Rockingham Counties were declared a primary disaster due to drought. Under this designation, producers with operations in any primary county are eligible to apply for low interest emergency loans.

Emergency loans help producers recover from production and physical losses due to drought, flooding and other natural disasters or quarantine.

Producers have eight months from the date of the declaration to apply for emergency loan assistance. FSA will consider each loan application on its own merits, taking into account the extent of losses, security available and repayment ability. Producers can borrow up to 100 percent of actual production or physical losses, to a maximum amount of \$500,000.

For more information about emergency loans, please contact your local FSA office or visit [www.fsa.usda.gov](http://www.fsa.usda.gov).
