

For: State and County Office Employees

MIDAS Simulations and Work Instructions for Product Master

Approved by: Deputy Administrator, Farm Programs

1 Product Master Simulations and Work Instructions

A Background

In preparation for the FSA, ITSD, MIDAS Project implementation and deployment, the MIDAS Training team has developed a comprehensive training plan. The training plan consists of the following 3 components:

- foundational learning sessions
- web-based training
- instructor led training.

Foundational learning sessions are available for review on the MIDAS Training Connect web site at <https://connections.usda.gov>. Web-based training is available in AgLearn.

In addition, materials were created to support end users in using MIDAS. The materials are in the form of simulations that provide a visual step-by-step view of how the system will behave. Work instructions were created that provide step-by-step actions for processes in the form of a PDF document.

B Purpose

This notice provides links to MIDAS simulations, work instructions, and support documents for Product Master.

Disposal Date	Distribution
December 1, 2013	State Office employees; State Offices relay to County Office employees

Notice CP-693
