

For: State and County Offices

**Production Reporting System (PRS) Rollover of 2010 Program Year Data**

Approved by: Acting Deputy Administrator, Farm Programs

**1 PRS Rollover of 2010 Program Year Data**

**A Background**

Annually, PRS automatically completes a rollover process to carry over all production and acreage data entered for a farm to the subsequent program year. All production and acreage data previously entered for a farm in PRS will be rolled over during this process, including data that was entered in PRS but not approved.

**B Purpose**

This notice advises that the 2010 PRS program year rollover process will:

- run on or about **February 8, 2012**
- include a rollover of existing 2006 through 2010 production data
- **not** include a process to roll over data for farms that had reconstitutions completed and effective for the 2011 program year.

**Note:** County Offices must re-enter all 2006 through 2010 production data for farms that were reconstituted effective for program year 2011. See procedure in 1-DCP, paragraphs 510.5 through 510.8 for distributing production to resulting farms and tracts after a reconstitution has been completed.

An Information Bulletin will be issued after rollover has been completed to notify Field Offices that program year 2011 is available in PRS for data entry.

<b>Disposal Date</b>	<b>Distribution</b>
June 1, 2012	State Offices; State Offices relay to County Offices
