

For: State and County Offices

LDP's for Other-Type Sunflower Seed

Approved by: Deputy Administrator, Farm Programs

1 Market Rates for Sunflower Seeds

A Background

PSD received several calls about the sunflower market rates included on the Daily Market Rates sheet posted on the Price Support web site. The Daily Market Rates sheet provides market prices for sunflower seed “oil” and “other-type (non-oil)”.

B Purpose

This notice informs State and County Offices of the applicable market rate for determining the sunflower seed “oil” and “other-type”:

- CCC determined value for calculating the applicable repayment rate
- the Regionally Calculated Price (RCP) for calculating the LDP rate.

C Sunflower Seed Oil-Type Price

The sunflower seed oil-type market price shall be used to determine the CCC-determined value and RCP for sunflower seed oil and other-type. DACO tracks and lists the other-type sunflower prices on the Daily Market Rates sheet for informational purposes, **only**. The other-type sunflower seed price shall **not** be used to determine repayment or LDP rates for sunflower seed.
